ELECTION/RESTRICTION

ELECTION/RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claim(s) 24-45** drawn to polynucleic acids and methods using said polynucleic acids for determining the presence or absence of an HCV virus in a biological sample wherein the polynucleic acid utilized/examined is selected from a defined group which consists of SEQ ID NOs: 1-4 and 20-27, classified in Class 435, subclasses 5 and 6 and Class 536, subclass 23.1 and 24.3

2. The applicant is hereby required to elect a single sequence for prosecution on the merits (i.e. a single SEQ ID NO. must be elected) because each sequence is a patentably distinct entity with unique structural characteristics.

While this requirement is made in view of the explosive growth of sequence databases in recent years and in view of the fact that searches for multiple sequences per application are now unduly burdensome on the office and its examiners it is proper in light of statute, "[i]f two or more independent and distinct inventions are claimed in one application, the Commissioner may require the application to be restricted to one of the inventions." 35 U.S.C. 121. Pursuant to this statute, the rules provide that "[i]f two or more independent and distinct inventions are claimed in a single application, the examiner in his action shall require the applicant . . . to elect that invention to which his claim shall be restricted." 37 CFR 1.142(a). See also 37 CFR 1.141(a). Absent evidence to the contrary, each nucleotide sequences recited in the claims are presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq.

3. The applicant is advised that the response to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
